News Letter #7

October 2009

I have started back to school full time, for "Industrial Machining." It's pretty much a dream come true for any knifemaker. Not only am I learning new stuff every day, but I am allowed to work on anything I want! I have made improvements to my belt grinder and I am working to convert my surface grinder to run belts, then I'm gonna build a horizontal grinder.

I am still working to find my balance between school and work, and I am starting to get the hang of it. I am still working off some orders and I am pretty much on schedule for my quoted times. It's been hard finding the rhythm again

I have a new folder design that I am going to call the "Rockeye" that is biased on my Model 1 fixed blade, that should be done and up on the site presently.

Last month, Spyderco was good enough to license me to use their "Spyder-hole" blade opening device. So I made a super size FM-1 with a 5 inch blade to try it out on. I like it!

There is a new knife forum out there and I have my own sub-forum there! I invite all of you to join up (Free) and stop by and say HI. Be sure to tell them I sent ya!

I'm planning on setting up at the Las Vegas show again, Friday, January 15 -Sunday, January 17, 2010 Riviera Hotel & Casino. I hope to see a lot of folks there, maybe some of the Californians will make the road trip.

I hope this finds you well! I look forward to seeing you out there, thank you for your interest and support!

Respectfully submitted,

Les George
